

Registered Homes: Evering Road

Evering Road supports 6 people. 5 live in a shared house and one person lives in a self contained flat at the top of the house.

Registered Homes: Evering Road

The house has a shared living room and kitchen, two bathrooms and each person has their own bedroom. Two bedrooms are on the ground floor, which is wheelchair accessible. The kitchen is fully accessible to all.

Within the house the project concentrates on helping people to do as much as possible for themselves. This "active involvement" entails working out exactly what the person can do for themselves and providing opportunities for the person to do those things, providing support only in the things that people need support with and actively encouraging people to extend their skills.

Along with this the team has well established skills in

communicating with service users, many of whom don't use speech, Object of reference, and Makaton are used routinely in the project, and the use of pictorial aids around the house assist service users in making choices daily.

Supporting people with physical disability and associated health problems and with sensory impairment are important aspects of the teams work. To assist with mobility we have supported people in getting their own transport, so people get out and about as they wish.

The separate, self contained flat is used to provide a place for to people who want to live more independently but who need the protection of registered care to monitor and control risks. It has enabled people to develop skills and confidence and move on to independent living. The flat has two bedrooms, a bathroom, kitchen and living room.

The whole service is supported by a team with a manager and a senior support worker. At night, there is one person sleeping in and a waking night worker. During the day, there is a minimum of 2 staff on duty.
